Highlights of the News

Condensed Notes of General Interest

ALBERTA DEFAULTS BOND PAYMENT

Alberts failed to redeem two bond issues totalling \$2,000,000. Wednesday, and so became the first province in Canada to default on bonds of any kind. Premier Aberhart announced simply that "We haven't the money; I'm sorry, but we must default." Interest was being paid daily at Edmonton, Toronto and Montreal branches of the Imperial Bank, at which branches the bonds were payable.

The refusal of Premier Aberhart to accept the proposed loan council control of future borrowings, and his own intention to convert outstanding obligations to a lower rate, rather than pressure the dominion government to refuse the loan required to prevent default on the bond maturity.

PROPOSED \$1 DOG TAX DEFENDED

A motion to give second reading to the government bill, sponsored by Hon. W. N. Chant, to impose a tax of \$1 on all dogs in this province was defeated by the legislature. The bill provides for a \$10 kennel tax on purebred dogs, while all other dogs, the tax was to be \$1 for each dog. Purpose of the bill was to provide a fund from which compensation could be paid for sheep destroyed by dogs.

GOVERNMENT TAKES ON DISTRIBUTORS LTD. STUFF

All but approximately 20 of the 100 employees of Distributors Ltd. were taken over by the Liquor Control Board, and the new arm of Deliveries Ltd., when the province assumed control of beer distribution April 1.

EARTHQUAKE AT VERNON

A distinct earthquake shock of great intensity was felt at Vernon, B.C., about 11:30 a.m. on March 25. No damage was reported. The tremor was also reported at Kamloops, Merritt and Kelowna.

8,000 DRUG ADDICTS IN CANADA

There are more than 8,000 drug addicts in Canada and about 129,000 in the United States, a report of the League of Nations has disclosed. Despite world drug禁令 and laws and even strict police restrictions on the traffic in and manufacture of narcotics, tons of habit-forming drugs are still being manufactured and distributed illicitly throughout the world.

REST OF DIONNE FAMILY TO BE IN FILMS

Mr. and Mrs. Oliva Dionne, parents of the famous quintuplets, and their five older children, will follow the five 22-month-old daughters into moving pictures. Details of the contract signed with Universal Studio were not revealed.

COW FOUND ALIVE AFTER BURIED 17 DAYS

For 17 days Albert Harding's cow at Ridgeway, Ont., had been buried under a drift of snow and ice after a stampede. When Harding freed the animal he found it half dead, having nibbled at the stock and stuck into the snowdrift during its imprisonment.

SET HAUPTMAN DEATH FOR FRIDAY

Bruno Richard Hauptman, who has lived beyond three of his death dates, now faces a new one—Friday night at eight o'clock—but under conditions which make it extremely doubtful he would die even then for the Linda babby murderer.

WANTS HITLER WED 'TO KEEP BALANCE'

"Can you persuade Hitler to get married and keep him well balanced?"

The question was put to Anthony Eden, foreign secretary, during a debate in the British house of commons. The house roared with laughter, but Eden made no reply.

PROVINCIAL SALES TAX BILL INTRODUCED

New legislation providing for a two per cent sales tax in this province to raise 2 million dollars in the 1936-37 fiscal year was introduced recently. Though many articles will be covered a lengthy list of exemptions has been made including necessities such as milk, bread and other commodities.

REV. HART ACCEPTS CALL TO CALGARY

Was Minister Here for Several Years Up to Last Fall—Comes to Calgary From Asiniboina, Saskatchewan

Rev. John Hart of Asiniboina, Saskatchewan, will be induced next Friday evening at 8 o'clock as minister of the North Hill Presbyterian church in Calgary. Rev. Harry Lennox of Barrie, Ont., will perform the services.

Mr. Hart's call to the pastorate was endorsed last Thursday afternoon by the Calgary presbytery.

The charge to the congregation will be delivered by Rev. Alred Bright, and the call to the ministry by Rev. J. Graham. The benediction will be pronounced by the newly induced minister.

Rev. John Hart was for several years pastor of the Knox Presbyterian church in Bassano and his friends here with him success in his new charge.

LOCAL SOCIAL CLUB AMATEUR PROGRAM

Young People's Group Have Entertaining Evening—Stage "Amateur" Program at Regular Meeting—Page Major Bowes!

The Harmony club, a social club comprised of the younger people in Bassano, staged an entertaining program last Friday evening in the Odd-fellows hall with an "amateur" test in which over a dozen took part in the half hour of presentation.

Verne Thompson made use of the going in true Major Bowes' style.

After the program, which followed the amateur meeting, took the place of the regular entertainment, and was enjoyed greatly. Miss Jean Johnston was awarded first place among the competitors. Singing and musical competitions were featured on the half hour.

Following the program, luncheon was served and dancing was then enjoyed. About thirty of the club members were present.

Mr. and Mrs. Bowes of the group will be held in the near future for decision of officers; the present officers are President, Dan Morrison, and secretary, Verne Plumer.

Crowfoot

CROWFOOT, Mar. 29.—The Crowfoot bridge and road at the school last Sat evening for the wind-up session of the season. After a couple hours of bridge a delicious supper was served by the ladies. The boys say the only thing that was wrong with it was that they ate too much.

Mr. and Mrs. F. L. McNeely and son were present.

Mr. and Mrs. E. R. Bryson from Washington, D.C., Friday via Wayne. They had been spending the winter with friends and relatives in the States.

Mr. and Mrs. R. McKeyen and son spent on Friday after spending the winter at the home of Mr. and Mrs. F. L. McNeely.

Mr. and Mrs. L. L. Sykes last Friday evening to wind up the bridge for the winter. Floyd and Len Monk had the high score of the evening.

Mr. and Mrs. Claus Rodbourne and Tom were supper guests of Mr. and Mrs. F. L. McNeely.

Mr. and Mrs. L. L. Sykes, returning from the wedding, the occasion being their twenty-eighth wedding anniversary.

Mrs. Richards, Andy Jacobson and Holt Hopstien of Bassano spent the week end at the Heffelhouse home.

Mr. and Mrs. Sloane St. Cayley spent a few days last week visiting Mr. and Mrs. All Sloane.

Arthur Rodbourne went to Cayley with them to expect to work there this summer.

Mrs. J. Clarke Jr. is spending a few days visiting her parents, Mr. and Mrs. S. Leonard in Bassano.

Mrs. Heffelhouse, Arthur Guyatt and Carl Sykes were business callers in Cayley last Friday.

Quinn a member from this vicinity attended the Melville salt at Countess last Wednesday.

Tom Mullin purchased about 15 head of cattle there and Joe Roberson reports that he is going to flood the market with eggs, as he purchased about 100 pure bred hens.

Mr. and Mrs. G. L. McNeely, working for Mrs. Blake Robertson.

The Greyhound bus was stuck for nearly 2 hours a half mile east of Guyatt's service station last Saturday evening. The bus was going west but had to turn back to Bassano.

Mr. B. Hartley returned home last Sat. after spending a few days in the Bassano Hospital.

Geo. Greaves of Majorville has been having calls from Crowfoot to his place across the river Thursday.

The cold store keeper is very hard hit on the already overtaxed stock. Many report further losses.

Mr. Mrs. D. MacLeod Move To Medicine Hat Residence

Mr. and Mrs. Dan MacLeod, residents of Bassano for nearly eight years, left Tuesday morning for Medicine Hat where they will reside in the future.

Mr. MacLeod was engaged for Distributors Ltd. at their warehouse here during the time he was residing here; but the best distribution having been taken over by the presbytery, the warehouse was closed down and the agent's services dispensed with. Mr. MacLeod will be with the Calgary Brewing and Malting Co. again in Medicine Hat.

Bassano people are sure to see Mr. and Mrs. MacLeod leave, and extend best wishes to them for future happiness in their new home.

CROWFOOT MAN WINS MONEY IN SWEEPSTAKE

The Mall learned from a well-known Crowfoot man was informed by the manager of the hotel that he had won \$100 in the Irish Hospital sweepstakes. He was advised a telegram would follow on April 3 with instructions for obtaining the money. The lucky ticket was sold by a Crowfoot man.

The Mall learned from a reliable source that a well-known Crowfoot man was informed by the manager of the hotel that he had won \$100 in the Irish Hospital sweepstakes. He was advised a telegram would follow on April 3 with instructions for obtaining the money. The lucky ticket was sold by a Crowfoot man.

GODFREY—Born to Mr. and Mrs. Geo. Godfrey of Bassano, a son, on April 2.

BARANIUK—Born to Mr. and Mrs. Wm. Baraniuk of Spring Coulee, a son, on March 28.

OSADCHUK—Born to Mr. and Mrs. Mike Osadchuk of Jenifer, a son, on March 25.

Hussar

HUSSAR, March 30.—Naughty Hussar, Hussar cannot beat that, but last weekend seeing through a herd of cattle, Upper Lake, he was beaten. However, it was given to him to just native stock in their new buffalo-like coats, donned to withstand the rigors of this winter.

Mr. and Mrs. R. McKeyen and son were present on Friday after spending the winter at the home of Mr. and Mrs. Holt in Bassano.

Mr. and Mrs. Billie Trewood, who have been making an extensive tour of the eastern States, attempted to make a stopover at Hussar Saturday, but were unable to get far enough from Standard, and remained there over the weekend.

Owing to the blizzard on Saturday and Sunday morning, Rev. A. R. Allard, pastor of the Hussar church, got down to town on Sunday, so there were no church services.

The April Art Meeting will be held at the home of Mrs. S. Lawrie on the 9th. All ladies are cordially invited to attend.

With the roads are again dried off, many a lone boyader found that the snow might all disappear two weeks ago, and there would be no more soft water; but alas for poor Hussar! But there is one comfort, dust storms have not been ravaging as in the past.

Mr. and Mrs. F. Brink returned to Hussar last Friday. Mr. Brink is shipping some 3,000 bushels of wheat to Saskatchewan for seed.

Mrs. V. LeGrand returned on Sunday evening, Mrs. Brink, with her son, Shirley, and daughter, Shirley, from Crowsnest Pass, Alberta, where she had been called to take care of the illness of her son, Gordon. Gordon returned to Hussar Monday's train. He is somewhat recovered, but far from well yet.

Mr. and Mrs. G. L. McNeely, working for Mrs. Blake Robertson.

The Greyhound bus was stuck for nearly 2 hours a half mile east of Guyatt's service station last Saturday evening. The bus was going west but had to turn back to Bassano.

Mr. B. Hartley returned home last Saturday after spending a few days in the Bassano Hospital.

Geo. Greaves of Majorville has been having calls from Crowfoot to his place across the river Thursday.

The cold store keeper is very hard hit on the already overtaxed stock. Many report further losses.

The W. L. met with Mrs. S. Lawrie on Thursday afternoon, with 12 members and visitors present.

Miss Margaret LeGrandeur and Mr. A. Low went to Calgary on Saturday to meet Gordon LeGrandeur, but on account of the storm, were unable to return the same day.

A very important meeting is called for Tuesday, April 7, of all members, to be held in Gem school. Important business is to be discussed, and every member is urged to make an effort to be present. Prospective members and visitors are always welcome.

The W. L. met with Mrs. S. Lawrie on Thursday afternoon, with 12 members and visitors present.

Miss Margaret LeGrandeur and Mr. A. Low went to Calgary on Saturday to meet Gordon LeGrandeur, but on account of the storm, were unable to return the same day.

The W. L. met with Mrs. S. Lawrie on Thursday afternoon, with 12 members and visitors present.

Miss Margaret LeGrandeur and Mr. A. Low went to Calgary on Saturday to meet Gordon LeGrandeur, but on account of the storm, were unable to return the same day.

The W. L. met with Mrs. S. Lawrie on Thursday afternoon, with 12 members and visitors present.

Miss Margaret LeGrandeur and Mr. A. Low went to Calgary on Saturday to meet Gordon LeGrandeur, but on account of the storm, were unable to return the same day.

The W. L. met with Mrs. S. Lawrie on Thursday afternoon, with 12 members and visitors present.

Miss Margaret LeGrandeur and Mr. A. Low went to Calgary on Saturday to meet Gordon LeGrandeur, but on account of the storm, were unable to return the same day.

The W. L. met with Mrs. S. Lawrie on Thursday afternoon, with 12 members and visitors present.

Miss Margaret LeGrandeur and Mr. A. Low went to Calgary on Saturday to meet Gordon LeGrandeur, but on account of the storm, were unable to return the same day.

May God forbid our saying on this page the things that merely please. We would be humble in our opinions; we would be considerate of the opinions of others; but we would not be afraid of the immutable laws of cause and effect; for therein lies the wisdom of the ages.

CLASH OF GOVERNMENT ADVISERS

The climax to an eventful few months was reached with Major Douglas, founder of the Social Credit movement, brook off relations with Premier William Aberhart and the Social Credit government of Alberta, and resigned his adviser.

Obviously Major Douglas was displeased at the appointment of R. J. Major to the position of financial adviser to Premier Aberhart. Just what impelled the premier to make this appointment has never been disclosed. But certainly the views of two men of such diametrically opposite outlooks must clash.

The premier explained that Mr. Major was appointed to advise on practical methods of meeting the immediate financial situation, due to an empty treasury and impending maturity of large issues of provincial bonds. Hon. Mr. Aberhart apparently conceived Social Credit to be something apart from the routine of government financing. Faced with facts, rather than theory, he chose what he considered a practical plan of meeting them.

Major Douglas, on the contrary, believed that following orthodox lines was the wrong attitude to take. Judging from the correspondence made public the major suggested loading the debt burden on the federal government in a "take it or leave it" attitude. If the federal government chose to let Alberta default then the burden would be on it.

Another point was that Major Douglas did not desire any tax increase. Also, very likely, he did not favor codes. The code idea was never a part of the Douglas plan, although he envisaged "just prices". But these just prices were described as prices below cost of production, the difference being made up by the government.

Altogether the whole matter is a conflict between two exponents of Social Credit, the founder and his leading disciple. Just what Major Douglas would have done had he been placed in the premier's position is another question.

A LITTLE LATER, MAYBE

A wife paid a surprise visit to her husband's office and, creeping up behind him, put her hands over his eyes.

"Guess who it is?" she asked gleefully.
"Stop fooling," was the reply, "and get on with those letters!"

DAIRY PRODUCTS AND DIET

A large percentage of the world's population is undernourished, according to a survey made by the League of Nations. This condition persists in the face of an abundance of food. But the problem does not lie altogether with abundance. Selection of the proper foods for human consumption is of great importance. In proof of this may be cited the fact that the children of wealthy parents frequently suffer from rickets, which is a disease caused by lack of nourishment.

Milk is the essential diet of a vigorous people. Dairy products, wheat, oats and soy beans furnish a diet high in calcium, protein and vitamins A and C. Dr. Henry C. Sherman of Columbia University says our average life span has increased from four to five years because we drink six times as much milk as we did thirty years ago. De-vitalized food stunts a people and the cities of the people of Glasgow, the puniest in all Europe, as evidence bearing out this statement. There was a time when the Scotch had the best physiques in all of Europe, but dietary changes have deteriorated the race.

Mongolians are rugged, huge giants mainly because of their diet of dairy products and soy beans. The rice-eating southern Chinese are puny in comparison. The Germans, among the most virile people in the world today, eat high-protein food.

A young country like Western Canada could easily develop a healthy, rugged, tall and stalwart race of people if parents were educated to follow a proper diet in supplying their families with food. Milk, butter and cheese should be the mainstay of such a diet, with abundance of bread, rolled oats, vegetables, and items containing vitamin A which build up resistance to disease. Most vitamins are found in the familiar codliver oil preparation.

One thing produced in abundance is milk and milk products. A diet based on these will produce a vigorous long-lived people.

DELAY IN MOUNTAIN HIGHWAY

It seems a pity that the all-Canadian highway across the Rocky and Selkirk mountain ranges has not been completed. Work has been progressing for some years now on the "missing link"—the stretch from Golden to Revelstoke—but it seems that much more remains to be done.

The easiest and most convenient route to the coast now lies through the United States. Montana, Idaho, Oregon and Washington have splendid highways and Prairie auto tourists, bound for British Columbia's coast, turn southward to take advantage of the excellent roads. Spokane, capital of the Inland Empire, figures a poor year when a million Canadian dollars are not spent in its vicinity. Portland, Tacoma, Seattle and dozens of the smaller cities in the great U.S.A. Northwest profit greatly from Canadian tourists.

The new Canadian mountain highway will change the line of travel and open new vistas of mountain scenery to the patriotic motorist. Idaho, Washington and Oregon have no mountain splendors such as our own Rockies reveal to the eye of the auto tramps. In fact the all-Canadian highway should attract thousands of motorists from the United States, to whom it will offer new scenes of infinite grandeur and variety.

The Canadian route goes west to Golden, loops northward around the Big Bend to Revelstoke and then hits the rehabilitated Caribou trail to Vancouver. When completed it will provide one of the most spectacular auto trips in North America.

WILLING

An itinerant musician was stranded in a village one Sunday morning, and, as he was playing his cornet in the street, he was approached by the clergyman of the parish, who said, "Do you know the Fourth Commandment, my good man?"

"No," the man replied, "but if you'll just wait it over, I'll do my best."

SOME POST OFFICE!

According to the San Francisco Argonaut the deficit on the United States General Post Office operations last year will be over \$65,000,000. Postmaster-General Farley, of course, denies this.

The profit of the British General Post Office last year is exactly the alleged amount of the deficit of the American Post Office. This notwithstanding that 8,000 people have been added to the staff and the wages bill is \$15,000,000 higher than the year before.

Figures of the British postal service are astonishing. In 1935 it handled seven billion letters, also several billion newspapers, magazines and parcels. The annual revenue is \$4,500,000,000. Enormous as the mail traffic in London is you can post a letter to a friend "somewhere in London" at 8:00 o'clock in the morning and receive a reply in the evening.

The telephone system of Great Britain is operated by the Post Office. It handles 1,500,000,000 calls a year. The engineering technique has reached a point where 250 conversations can be carried over one wire at the same time without interference. The British postal telephone service tells subscribers the time, will call you at a certain hour in the morning if you notify exchange the night before, and will give you the weather forecast. Pretty good service, eh what?

This year \$15,000,000 will be spent on improvements. In 1914 telephone receipts were \$35,000,000; in 1935 they were \$135,000,000. In 1916 there were 2,000,000 miles of cable and telephone wires; now there are 12,000,000 miles, 10,000,000 miles of which are underground, immune from storms.

The air mail has grown rapidly. Begun in 1919, only two tons of air mail were carried altogether. Last year it carried 7,000,000 letters and 80 tons of packages.

Motor trucks covered 65,000,000 miles a year. The Post Office also owns a tiny railway underground from Paddington to the main office, about five miles. Mail is loaded on at each end and the train just automatically goes to its destination without a stop in a few minutes, thus saving the delays of transportation along crowded streets.

Then there is a savings bank department which handles about \$2,000,000,000 a year. Yes—some Post Office!—*Ponoka Herald*.

BUSINESS MEN

"Yes, father," said the oldest daughter, just back from college, "I'm sure you'll like Charles, he's a wonderful young man."

Father looked interested.

"Has he any money?" he demanded.

"Oh, Dad," said the girl, "you men are all alike. You're so curious. Charles asked me the same thing about you."

The Nicotine Fallacy

Is it the nicotine in tobacco that stains the hands, causes tobacco breath and affects the heart and lungs? Is it the nicotine that is used to test the addictive effect of a half dozen chemicals added to raw tobacco? As a research authority Dr. Green not only supplies adequate answers, but advances the smoking contention that nicotine in tobacco is actually destroyed by heat during the toasting process. Is smoking, then, harmful or harmless?

By P. CHARLES GREEN, M.D.

When tobacco smoke is inhaled

into the lungs it has taken the most direct approach to the blood stream and to the heart. In a hundred ways this heat, which destroys the tobacco smoke contains, and what effect will it have on the human system? The answer has been that the most important and most lethal poison in tobacco smoke is nicotine, but nicotine is not the only nicotine that is held responsible for every untoward effect of tobacco smoking. If there is a rise in blood sugar after smoking nicotine is blamed. It is still a laboratory question but the human symptoms that are known to be caused by nicotine, which are all attributed to nicotine, to which are also attributed tobacco smoking, tobacco odor, and tobacco breath. The fact is that nicotine causes none of these things. The reason that research workers have overlooked is that in the smoke of some cigarettes there is absolutely no nicotine at all. In others it is present in the smallest amounts in different forms that have not the slightest relation to the poison nicotine sulphate.

Of the hundreds of investigations that have been reported in cigarette research not a single one has ever been actually confirmed because they started on a common fundamental error.

The failure to take into consideration the widely varying chemical formulas of different cigarettes.

The first chemical used in all packages is potassium nitrate for ignition. This chemical is not in the "roll your own" or pipe tobacco, for the free access of the oxygen of the air to the wood cause miniature explosions to take place in the pipe or cigarette when used for ashtray and ashtray.

They are gum arabic, licorice, starch, and glucose products. The next set of chemicals are essential oils used for flavoring. Finally, glycerine is almost universally used as a moisture softening ingredient.

When you make a formula from any or all of the chemicals, place the combination in a confined space, add a heavy moisture content of ten to twenty per cent of water and ignite. What happens? You get a smoke that can surmise a widely varying array of chemical reactions, no two of which are alike. Therein is contained the first error in cigarette research, for every last cigarette will give you a different chemical combination and a different chemical result.

One of the results of all these chemical action on the tobacco vehicle is the destruction and change of the nicotine content in the cigarette. There is no nicotine in the wood alone, but will completely destroy it, so you start off by figuring that only 10 per cent of nicotine can reach the smoker and that never as the notorious nicotine sulphate in the laboratory, but as one of the twenty thousand different varieties of nicotine which chemists have succeeded in isolating.

While in this instance we are only endeavoring to prove that nicotine is not the devil head, it will be well to remember other poisons present in cigarette smoke. Carbon monoxide, wood alcohol, pyridine, nitrous fumes and narcotic.

Then why is anyone able to smoke if any or all of these poisons are to be taken into the body? The answer is that they could not. If it were

as bad as the air that is breathed into the lungs at the same time. With every puff of a cigarette a deeper breath is taken and, in the case of one who inhales, the depth of breathing is triple or quadruple the ordinary rate of respiration.

Every physician remembers Sir Humphry Davy's classic experiment on himself. In testing out the effects of nitrous oxide with his nostrils completely plugged, he was rendered unconscious after three puffs. He was then conscious again, though insensible and almost dead from the effects.

The next question is, how much of the tar and of other deleterious ingredients is retained in the system when the smoke is exhaled. Dr. N. G. Schubert, of the Max Kohl Institute of Pulmonary and Respiratory Medicine, Berlin, Wilhelm Institute of Biochemistry, Berlin, reported that not more than one-tenth of the wood alcohol inhaled was again exhaled.

Smoking of twenty cigarettes containing twenty grams of tobacco a

day, a smoker would inhale 40 mg. of wood alcohol, and that would not be particularly dangerous unless the person was already afflicted with heart or lung disease.

Dr. Emil Bogen in the American Journal of Cancer stated that he found the tar residue in cigarette to be 4.84 per cent of the total weight of the body 1.56 p.m. to 1.65 p.m. Cigarette manufacturers are not interested in these facts, their attitude being "Why bring that up?" The public does not know about it, we let sleeping dogs lie.

Dr. H. C. Green, of the Mayo Clinic, says beginning to smoke, the ones who are producing them are the toothpaste manufacturers and other commercial agencies.

The study of cigarette smoke and its effects on the consumer is primarily a job for physical and biological sciences like other jobs, if the fundamentals are neglected, the results are not accurate.

If tobacco manufacturers were wise men instead of myopic business men they would welcome the research in that area to further protect their product and at the same time protect the health of the consumer.

Much rationalization of this problem is being worked out in England where the British Tobacco Control Board has issued certain chemicals that can be added to tobacco. A semi-smitten smoker can tell the difference between Canadian, English and American cigarettes.

This article has been written in order to bring out the fact that not only does every brand of cigarettes contain nicotine, but cigarettes of every other brand, but cigarettes of the same brand may differ over a few months' time in manufacture.

Furthermore that this chemical formula in the action of nicotine, motion and taste and the kind of tobacco used may, and does change the amount of the tobacco vehicle so that no nicotine may reach the lungs of the smoker.

What does reach the lungs of the smoker is tar, for it is absolutely impossible for any one to take even the lightest puff without some of that smoke being taken into the lungs.

With every puff the smoker unconsciously takes a deeper breath, and the air that comes through the nose and mouth is forced to enter the lungs at the same time. So much is this the case that if iodine is added to a cigarette and that cigarette smoked, an x-ray of the lungs will outline its presence clearly.

Digest and Review.

Population Per Square Mile

The figures, on the right are, the populations of the principal countries in the world, the respective countries. If Canada were as thickly populated as Belgium it would have a population of about 2,557,775,000, or about 650,000,000 more people than there are in the entire world.

England and Wales 650.5

CANADIAN PACIFIC**ADVERTISEMENTS****are a guide to value**

Experts can roughly estimate the value of a product by looking at it. More accurately, by handling and examining it. Its appearance, its texture, the "feel" and the balance of it all mean something to those trained eyes and fingers.

But no one person can be an expert on steel, brass, wood, leather, food-stuff, fabrics, and all of the materials that make up a list of personal purchases. And no expert are fooled, sometimes, by concealed flaws and imperfections.

There is a sure index of value in the sense of sight and touch—knowledge of the maker's name and for what it stands. Here is the most certain method, except that of actual use, for judging the value of any manufactured goods. Here is the only guarantee against careless workmanship, or the use of shoddy materials.

This is an important factor which it pays to read advertisements and to buy advertised goods. The product that is advertised is worthy of your confidence.

Local and Personal News Notes

If you know of an item for this column, let us know. We appreciate your help in recording the comings and goings of yourself, friends and relatives. Phone 19.

Mrs. W. S. Playfair was in Calgary last week.

M. Emil and Roy have moved out to the Matlick farm at Coates.

Bill Gibbs, who was formerly with the Texaco Garage here, returned to Gern.

Ralph Engle returned last Saturday from a two months' visit in the northern States.

The Anglican W.A. will hold a tea on Saturday, April 18. Further details will be announced later.

Roy Smith motored to Calgary on Tuesday on a business trip; while there he will attend the Spring Livestock sale.

Mrs. Herbert Treiber and daughter Verna of Schuler are here visiting the former's parents, Mr. and Mrs. Adam Meidinger.

Bob Donaldson is spending the week at home from his studies in the Technical Institute in Calgary. Mr. Donaldson is on the sick list with the flu.

W. J. Redmond has purchased the house owned by H. W. Ford and recently occupied by Dr. MacLeod. The Redmonds moved into the house this week.

Donald McGregor, who has been on the sick list, left for Hanna on Tuesday where he will be under the doctor's care. —Cesford news item in Hanna Herald.

Hockey is still being played by the younger element in town on the sheet of ice opposite the Royal Bank. Though it is warm, there is still lots of snow and the ice has not yet disappeared.

Heard 'n' Seen

We weren't going to write this column this week 'cause we were afraid there might be a law passed taxing it . . . that's all over now. Persuasives, however, will not be dealt with; we'll just relate a few of the quips we plagiarized.

Somebody has given this definition of a budget: "Telling your money where to go instead of wondering where it went."

Husbands in a South American jungle tribe speak one language and their wives another. We hadn't realized that gold and bridge had become part of the wilderness.

Much of the money wasted on swashbucklers would be better spent on bestsellers.

The Grand Canyon is one depression that pays its own way.

A columnist in a person who turns out so much copy he doesn't have time to think.
